

Student (m/f) Part-time

Test Implementation Area Network Technologies

Quality Breeds Success

EANTC (European Advanced Networking Test Center) is a privately-held German company based in Berlin and founded in 1999. Our highly specialized team conducts innovative, advanced testing services of superior quality. Our customers are leading network equipment manufacturers worldwide, European and Middle East service providers and large enterprises in multiple industry sectors.

Open Job Position

We are looking for a part-time student (male/female) who supports us in the implementation of our international projects. His/her tasks will include:

- create and review test plans and –specifications for our customers
- execute performance, scalability, conformance and interoperability tests
- use test automation scripts and create new scripts

We offer a study-related full-time unlimited job with a 20-hour week. We are a small internationally operating company - you will benefit from this by the fact that you will

- develop your intercultural skills
- get an insight into all areas and processes and be actively involved in our projects
- get paid for your performance (by arrangement and qualification)

The Ideal Candidate

- is receiving an education, for example bachelor or masters degree in computer science or electrical engineering with focus on telecommunications
- knows telecommunications network protocols of ISO/OSI layers 2–7 and various LAN-, MAN- and WAN network technologies focusing IETF, IEEE, ETSI/3GPP and MEF standards
- has programming experience in e.g.: perl, c, c++, TCL/Tk
- speaks and writes excellent German and English
- enjoys working in an international environment
