

MEF-CECP Seminar

In-Depth Training – From Basics to New Developments

An increasing number of service providers offer standardized Ethernet services complying with the MEF service specifications. EANTC offers an intensive 5-day seminar covering all Carrier Ethernet standards, technologies and applications in order to become an expert in Carrier Ethernet and its implementations.

EANTC has been teaching Carrier Ethernet trainings since 2007. We are now partnering with Tech2000, an MEF Accredited Training Provider, to offer participants an optimal preparation for the official MEF exam.

We are dedicated to provide vendor-independent Carrier Ethernet seminars where theory and hands-on experience is combined.

■ Target Audience

In particular, the seminar addresses service provider or equipment vendor professionals such as technical managers, pre-sales staff, network designers and operational staff who require thorough Carrier Ethernet knowledge to buy or sell, design or operate Carrier Ethernet services.

A basic knowledge of packet transport networks, IP and wide area networking principles is required.

■ Why EANTC and Tech2000?

As a vendor-independent test lab, we have seen and tested virtually all Carrier Ethernet equipment available today.

- Our daily business is to provide design consultancy and quality assurance services to telecom operators worldwide.
- We are not tied to any vendor and do not sell or OEM any equipment to remain independent.
- Seminars at our headquarters in Berlin include in-class exercises.
- Tech2000's qualified and authorized trainers are knowledgeable in all the facets and nuances of Carrier Ethernet.

■ Seminar Content

- Services Definitions
- Transporting Carrier Ethernet Services
- Carrier Ethernet Access Technologies
- Basic Definitions
- Key UNI, ENNI, OVC, and EVC Service Attributes
- Certification
- Target Application for Ethernet Services
- Comparing and Positioning Ethernet Services
- Circuit Emulation over Ethernet
- Service Operations Administration and Maintenance (SOAM)

■ Our Presenters

The course is led by an MEF-CECP certified instructor who has years of experience and will pass on their first-hand knowledge to the participants.

■ Outline

The 5-day seminar is limited to 12 participants to ensure an interactive exchange between attendees and trainer. All seminars are held in English and the training material is delivered in English only.

■ Registration

I would like to register the following person(s):

Company: _____

Address: _____

ZIP/City/Country: _____

Phone: _____

E-mail: _____

■ Any Questions?

All our seminars are cost-effective solutions to your training requirements. For more information please contact us.

The seminar can also be individually tailored to match your needs and wishes at a date and location of your choice. Prices available on request.
